

U.S. All Cap Growth Fund

OBJECTIVES AND PROCESS

- Seeks long-term capital appreciation
- Invests at least two-thirds of its assets in equity securities of US companies of any size
- Uses bottom-up research to identify high-quality investments in companies with robust and sustainable growth of revenues and earnings
- Looks for companies that are perceived as strong ESG performers or companies with underappreciated ESG characteristics that can drive future growth
- Promotes and influences a company's ESG trajectory through engagement
- Uses a negative screen to exclude securities issued by companies based on their exposure to ESG risks
- May invest:
 - up to 25% of total assets in equity securities through ADRs, CDRs, EDRs, GDRs, IDRs
 - in derivatives for hedging or efficient portfolio management purposes

KEY RISKS

Market risk: securities may decline in value due to factors affecting securities markets generally, and equity securities generally have greater price volatility than debt securities.

Geographic concentration risk: investments concentrated in specific geographic regions and markets may be subject to greater volatility due to economic downturns and other factors affecting the specific geographic regions.

Smaller-company securities risk: securities of companies with smaller market capitalisations tend to be more volatile and less liquid than securities of larger companies. **ESG risk:** applying an ESG screen for security selection may result in lost opportunity in a security or industry resulting in possible underperformance relative to peers, ESG screens are dependent on third party data and errors in the data may result in the incorrect inclusion or exclusion of a security.
