Investors could lose money by investing in a money market fund. Money market funds that seek to preserve the value of an investment at \$1.00 per share cannot guarantee to do so. Because the share price of some money market funds may fluctuate, shares may be worth more or less upon their sale than what was originally paid for them. Some money market funds may impose a fee upon the sale of shares or may temporarily suspend investors' ability to sell shares if the fund's liquidity falls below required minimums because of market conditions or other factors. An investment in a money market fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. A money market fund's sponsor has no legal obligation to provide financial support to the fund, and investors should not expect that the sponsor will provide financial support to the fund at any time.

Wells Fargo Asset Management (WFAM) is the trade name for certain investment advisory/management firms owned by Wells Fargo & Company. These firms include but are not limited to Wells Capital Management Incorporated and Wells Fargo Funds Management, LLC. Certain products managed by WFAM entities are distributed by Wells Fargo Funds Distributor, LLC (a broker/dealer and Member FINRA).
