ANDREW OWEN President Allspring Funds

Markets rebounded from a rough first half of the calendar year in July 2022, led by U.S. stocks. While U.S. economic activity showed signs of waning, the country's labor market remained strong. "

Dear Shareholder:

We are pleased to offer you this annual report for the Allspring California Tax-Free Fund for the 12-month period that ended June 30, 2023. Globally, stocks and bonds experienced heightened volatility through the period. The market was focused on persistently high inflation and the impact of ongoing aggressive central bank rate hikes. Compounding these concerns were the global reverberations of the Russia-Ukraine war. Riskier assets rallied in 2023, with anticipation of an end to the tight monetary policy despite concerns of a possible impending recession. After suffering deep and broad losses through 2022, bonds now benefit from a base of higher yields that can help generate higher income. However, ongoing rate hikes continued to be a headwind during recent months.

For the 12-month period, stocks generally outperformed bonds-both domestic U.S. and global. For the period, U.S. stocks, based on the S&P 500 Index,1 gained 19.59%. International stocks, as measured by the MSCI ACWI ex USA Index (Net),² returned 12.72%, while the MSCI EM Index (Net) (USD)³ had more muted performance, with a gain of 1.75%. Among bond indexes, the Bloomberg U.S. Aggregate Bond Index4 returned -0.94%, the Bloomberg Global Aggregate ex-USD Index (unhedged)⁵ fell 1.83%, the Bloomberg Municipal Bond Index⁶ gained 3.19%, and the ICE BofA U.S. High Yield Index⁷ returned 8.97%.

Despite high inflation and central bank rate hikes, markets rallied.

Markets rebounded from a rough first half of the calendar year in July 2022, led by U.S. stocks. While U.S. economic activity showed signs of waning, the country's labor market remained strong: July nonfarm payrolls grew by more than 500,000 and U.S. unemployment dipped to 3.5%. Meanwhile, crude oil and retail gasoline prices—major contributors to recent overall inflation—fell substantially from earlier highs. And while U.S. home prices rose, sales fell as houses became less affordable with mortgage rates at a 13-year high. The Federal Reserve (Fed) raised the federal funds rate 0.75% in July—to a range of 2.25% to 2.50%—and forecasts pointed to further rate hikes.

August was a broadly challenging month. High inflation persisted, cresting 9% in the eurozone on an annual basis and remaining above 8% in the U.S. despite the Fed's aggressive monetary policy and a major drop in global crude oil and gasoline prices from their June peak. One positive was the resilient U.S. jobs market. However, the Fed's job was clearly not complete. One longer-term bright spot was the U.S. Congress's passage of the Inflation Reduction Act. Its primary stated goals include to reduce inflation (though not immediately) by curbing the deficit, capping health care spending by seniors, and investing in domestic sources of clean energy.

The S&P 500 Index consists of 500 stocks chosen for market size, liquidity, and industry group representation. It is a market-value-weighted index with each stock's weight in the index proportionate to its market value. You cannot invest directly in an index.

The Morgan Stanley Capital International (MSCI) All Country World Index (ACWI) ex USA Index (Net) is a free-float-adjusted market-capitalization-weighted index that is designed to measure the equity market performance of developed and emerging markets, excluding the U.S. Source: MSCI. MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indexes or any securities or financial products. This report is not approved, reviewed, or produced by MSCI. You cannot invest directly in an index.

The MSCI Emerging Markets (EM) Index (Net) (USD) is a free-float-adjusted market-capitalization-weighted index that is designed to measure the equity market performance of emerging markets. You cannot invest directly in an index.

The Bloomberg U.S. Aggregate Bond Index is a broad-based benchmark that measures the investment-grade, U.S.-dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, mortgage-backed securities (agency fixed-rate and hybrid adjustable-rate mortgage pass-throughs), asset-backed securities, and commercial mortgage-backed securities. You cannot invest directly in an index.

The Bloomberg Global Aggregate ex-USD Index (unhedged) is an unmanaged index that provides a broad-based measure of the global investment-grade fixed income markets excluding the U.S.-dollar-denominated debt market. You cannot invest directly in an index.

The Bloomberg Municipal Bond Index is an unmanaged index composed of long-term tax-exempt bonds with a minimum credit rating of Baa. You cannot invest directly

The ICE BofA U.S. High Yield Index is a market-capitalization-weighted index of domestic and Yankee high yield bonds. The index tracks the performance of high yield securities traded in the U.S. bond market. You cannot invest directly in an index. Copyright 2023. ICE Data Indices, LLC. All rights reserved.

In September, all asset classes suffered further major losses. Central banks kept up their battle against rapidly rising prices with more rate hikes. The strength of the U.S. dollar weighed on results for investors holding non-U.S.-dollar assets. U.S. mortgage rates jumped to near 7% on 30-year fixed-rate mortgages; the decreased housing affordability began to cool demand somewhat. The U.K. experienced a sharp sell-off of government bonds and the British pound in September as investors panicked in response to a new government budget that was seen as financially unsound. The Bank of England (BoE) then stepped in and bought long-dated government bonds.

Equities had a reprieve in October. Globally, developed markets outpaced emerging market equities, which were hurt by weakness among Chinese stocks. Central banks continued to try to curtail high inflation with aggressive interest rate hikes. Geopolitical risks persisted, including the ongoing Russia-Ukraine war and economic, financial market, and political turmoil in the U.K. Concerns over Europe's energy crisis eased thanks to unseasonably warm weather and plentiful gas on hand. The U.S. labor market continued its resilience against rising prices as unemployment remained near a record low.

Stocks and bonds rallied in November. Economic news was encouraging, driven by U.S. labor market strength. Although central banks kept increasing rates, hopes rose for an easing in the pace of rate hikes and a possible end to central bank monetary tightening in 2023. Although inflation remained at record highs in the eurozone, we began to see signs of a possible decline in inflationary pressures as U.S. inflation moderated, with a 7.1% annual price rise in November and a monthly price increase of just 0.1%. China's economic data remained weak, reflecting its zero-COVID-19 policy.

Financial markets cooled in December, with U.S. equities declining overall in response to a weakening U.S. dollar. Fixed income securities ended one of their worst years ever, with generally flat monthly returns as markets weighed the hopes for an end to the monetary tightening cycle with the reality that central banks had not completed their jobs yet. U.S. Consumer Price Index (CPI),1 data showed a strong consistent trend downward, which brought down the 12-month CPI to 6.5% in December from 9.1% in June. Other countries and regions reported still-high but declining inflation rates as the year wound down.

The year 2023 began with a rally across global equities and fixed income securities. Investor optimism rose in response to data indicating declining inflation rates and the reopening of China's economy with the abrupt end to its zero-COVID-19 policy. The U.S. reported surprisingly strong job gains-employers added more than 500,000 jobs-and unemployment fell to 3.4%, the lowest level since 1969. Meanwhile, wage growth, seen as a potential contributor to ongoing high inflation, continued to moderate. All eyes remained fixed on the Fed and on how many more rate hikes remain in this tightening cycle. The 0.25% federal funds rate hike announced in January was the Fed's smallest rate increase since March 2022.

Markets declined in February as investors responded unfavorably to resilient economic data. The takeaway: Central banks would likely continue their monetary tightening cycle for longer than markets had priced in. In this environment—where strong economic data is seen as bad news-the resilient U.S. labor market was seen as a negative while the inflation rate was not falling quickly enough for the Fed, which raised interest rates by 0.25% in early February. Meanwhile, the BoE and the European Central Bank (ECB) both raised rates by 0.50%.

The collapse of Silicon Valley Bank in March, the second-largest banking failure in U.S. history, led to a classic bank run that spread to Europe, where Switzerland's Credit Suisse was taken over by its rival, UBS. The banking industry turmoil created an additional challenge for central banks in balancing inflationary concerns against potential economic weakening. Meanwhile, recent data pointed to economic strength in the U.S., Europe, and China. And China's economy continued to rebound after the removal of its COVID-19 lockdown. Inflation rates in the U.S., the U.K., and Europe all remained higher than central bank targets, leading to additional rate hikes in March.

The collapse of Silicon Valley Bank in March, the second-largest banking failure in U.S. history, led to a classic bank run that spread to Europe, where Switzerland's Credit Suisse was taken over by its rival, UBS. "

The U.S. Consumer Price Index (CPI) is a measure of the average change over time in the prices paid by urban consumers for a market basket of consumer goods and services. You cannot invest directly in an index.

Economic data released in April pointed to global resilience, as Purchasing Managers Indexes¹ in the U.S., U.K., and eurozone beat expectations and China reported first-quarter annualized economic growth of 4.5%. Despite banking industry stress, developed market stocks had monthly gains. The U.S. labor market remained strong, with a 3.5% jobless rate and monthly payroll gains above 200,000. However, uncertainty and inflationary concerns weighed on investors in the U.S. and abroad.

May was marked by a divergence between expanding activity in services and an overall contraction in manufacturing activity in the U.S., U.K., and eurozone. Core inflation remained elevated in the U.S. and Europe, despite the ongoing efforts of the Fed and ECB, which included rate hikes of 0.25% by both in May. Stubborn inflation and the resilient U.S. labor market led to expectations of further interest rate hikes, overall monthly declines across bond indexes, and mixed results for stocks in May. Investor worries over a U.S. debt ceiling impasse were modest, and market confidence was buoyed by a deal in late May to avert a potential U.S. debt default.

June featured the Fed's first pause on interest rate hikes since March 2022, when it began its aggressive campaign to rein in inflation. However, core CPI, excluding food and energy prices, while continuing to decline, remained stubbornly high in June, at 4.8%, well above the Fed's 2.0% target rate. With the U.S. unemployment rate still at 3.6%, near a historical low, and U.S. payrolls growing in June for the 30th consecutive month, expectations of more Fed rate hikes were reinforced. However, U.S. and global stocks had strong returns in June.

Don't let short-term uncertainty derail long-term investment goals.

Periods of investment uncertainty can present challenges, but experience has taught us that maintaining long-term investment goals can be an effective way to plan for the future. To help you create a sound strategy based on your personal goals and risk tolerance, Allspring Funds offers more than 100 mutual funds spanning a wide range of asset classes and investment styles. Although diversification cannot guarantee an investment profit or prevent losses, we believe it can be an effective way to manage investment risk and potentially smooth out overall portfolio performance. We encourage investors to know their investments and to understand that appropriate levels of risk-taking may unlock opportunities.

Thank you for choosing to invest with Allspring Funds. We appreciate your confidence in us and remain committed to helping you meet your financial needs.

Sincerely,

Andrew Owen President Allspring Funds

Notice to Shareholders

Beginning in July 2024, the Fund will be required by the Securities and Exchange Commission to send shareholders a paper copy of a new tailored shareholder report in place of the full shareholder report that you are now receiving. The tailored shareholder report will contain concise information about the Fund, including certain expense and performance information and fund statistics. If you wish to receive this new tailored shareholder report electronically, please follow the instructions on the back cover of this report.

Other information that is currently included in the shareholder report, such as the Fund's financial statements, will be available online and upon request, free of charge, in paper or electronic format.

Performance highlights

Investment objective	The Fund seeks current income exempt from federal income tax and California individual income tax.

Figures quoted represent past performance, which is no guarantee of future results, and do not reflect taxes that a shareholder may pay on an investment in a fund. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance shown without sales charges would be lower if sales charges were reflected. Current performance may be lower or higher than the performance data quoted, which assumes the reinvestment of dividends and capital gains. Current month-end performance is available on the Fund's website, allspringglobal.com.

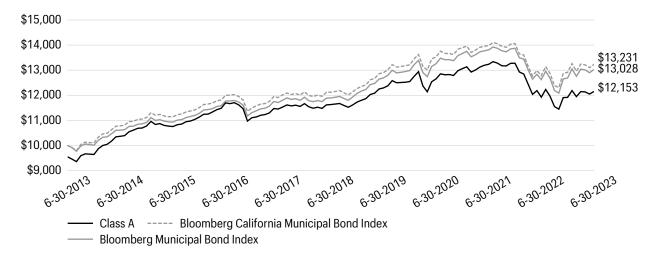

Index returns do not include transaction costs associated with buying and selling securities, any mutual fund fees or expenses, or any taxes. It is not possible to invest directly in an

For Class A shares, the maximum front-end sales charge is 4.50%. For Class C shares, the maximum contingent deferred sales charge is 1.00%. Performance including a contingent deferred sales charge assumes the sales charge for the corresponding time period. Administrator Class and Institutional Class shares are sold without a front-end sales charge or contingent deferred sales charge.

- 1 Reflects the expense ratios as stated in the most recent prospectuses. The expense ratios shown are subject to change and may differ from the annualized expense ratios shown in the Financial Highlights of this report.
- ² The manager has contractually committed through October 31, 2023, to waive fees and/or reimburse expenses to the extent necessary to cap total annual fund operating expenses after fee waivers at 0.75% for Class A. 1.50% for Class C. 0.55% for Administrator Class and 0.48% for Institutional Class. Brokerage commissions, stamp duty fees, interest, taxes, acquired fund fees and expenses (if any), and extraordinary expenses are excluded from the expense caps. Prior to or after the commitment expiration date, the caps may be increased or the commitment to maintain the caps may be terminated only with the approval of the Board of Trustees. Without these caps, the Fund's returns would have been lower. The expense ratio paid by an investor is the net expense ratio (the total annual fund operating expenses after fee waivers) as stated in the prospectuses.
- ³ Historical performance shown for the Institutional Class shares prior to their inception reflects the performance of the Administrator Class shares, and includes the higher expenses applicable to the Administrator Class shares. If these expenses had not been included, returns for the Institutional Class shares would be
- ⁴ The Bloomberg California Municipal Bond Index is the California component of the Bloomberg Municipal Bond Index. You cannot invest directly in an index.
- ⁵ The Bloomberg Municipal Bond Index is an unmanaged index composed of long-term tax-exempt bonds with a minimum credit rating of Baa. You cannot invest directly in an index.

Bond values fluctuate in response to the financial condition of individual issuers, general market and economic conditions, and changes in interest rates. Changes in market conditions and government policies may lead to periods of heightened volatility in the bond market and reduced liquidity for certain bonds held by the Fund. In general, when interest rates rise, bond values fall and investors may lose principal value. Interest rate changes and their impact on the Fund and its share price can be sudden and unpredictable. The use of derivatives may reduce returns and/or increase volatility. Certain investment strategies tend to increase the total risk of an investment (relative to the broader market). This fund is exposed to California municipal securities risk, high-yield securities risk, and non-diversification risk. Consult the Fund's prospectus for additional information on these and other risks. A portion of the Fund's income may be subject to federal, state, and/or local income taxes or the Alternative Minimum Tax (AMT). Any capital gains distributions may be taxable.

GROWTH OF \$10,000 INVESTMENT AS OF JUNE 30, 20231

¹ The chart compares the performance of Class A shares for the most recent ten years with the Bloomberg California Municipal Bond Index and Bloomberg Municipal Bond Index. The chart assumes a hypothetical investment of \$10,000 in Class A shares and reflects all operating expenses and assumes the maximum initial sales charge of 4.50%.

MANAGER'S DISCUSSION

Fund highlights

- · The Fund underperformed its primary benchmark, the Bloomberg California Municipal Bond Index, for the 12-month period that ended June 30, 2023.
- The primary drivers that detracted from performance were the Fund's longer duration relative to the index, an underweight to general obligation (GO) bonds, and credit quality, with an underweight to the stronger-performing AAA-rated and AA-rated categories.
- · Sector allocation was a detractor, with underweights to local GO, transportation, and leasing sub-sectors, all of which outperformed the index.
- Overall security selection contributed to performance, with strong performance in the water/sewer and industrial development revenue/pollution control revenue sub-sectors, in particular. An underweight to lower coupons also helped performance.

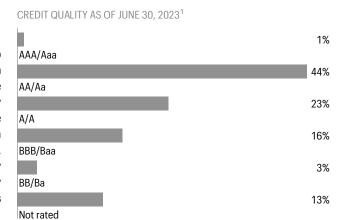

Global economies increase lending rates in hopes of taming runaway inflation.

Entering 2022, the excitement of a post-pandemic world gave way to new whispers and fears of higher prices and broad-based inflation caused by supply chain bottlenecks, increased housing costs, wage increases, and employment market distortions. Those fears quickly became reality and prices began to rise at a historic rate. The U.S. Federal Open Market Committee acted quickly and with purpose: ending open market purchases, reducing its balance sheet, and raising the benchmark overnight lending rate at each monthly meeting through 2022 and early 2023. Fixed income and equity markets fell sharply but began to recover as annual inflation numbers peaked in June and began to recede.

The U.S. unemployment rate, which reached a multigenerational high of more than 14% in the spring of 2020, fell throughout the past year and has settled below 4%. Employers continue to add jobs, especially in service-oriented industries, and the resulting wage increases have further contributed to inflationary pressures. After the U.S. gross domestic product turned negative in the first and second quarters of 2022, it expanded at rates above 2% in each subsequent quarter. The federal funds rate, which began 2022 at 0.25% to 0.50%, was raised 10 consecutive times before a pause in June 2023. It now sits at 5.25% to 5.50% as the U.S. Federal Reserve (Fed) attempts to curb inflation. In this environment, some form of recession seems imminent.

In the wake of continued rate increases, U.S. fixed income yields rose dramatically as investors reacted to Fed actions, with the yield on the 10-year Treasury ending the period near 4%. Rising U.S. Treasury yields affected all fixed income sectors in 2022, with all seeing their worst returns in more than 40 years. The U.S. Treasury yield curve remained substantially inverted throughout the period, which has driven many investors into shorter-term interest-bearing vehicles, including money markets.

Municipals sold off drastically to start the period but began to rebound in the fourth quarter of 2022. The Bloomberg Municipal Bond Index fell nearly 8% and the broader municipal market had more than \$124 billion in outflows before stabilizing early in 2023. For the first time in history, the municipal yield curve also inverted but not to the degree seen in Treasuries.

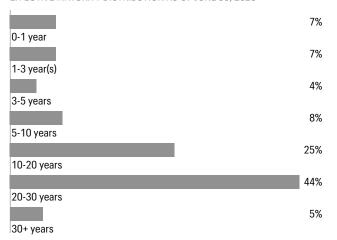

¹ The credit quality distribution of portfolio holdings reflected in the chart is based on ratings from Standard & Poor's, Moody's Investors Service, and/or Fitch Ratings Ltd. Credit quality ratings apply to the underlying holdings of the Fund and not to the Fund itself. The percentages of the portfolio with the ratings depicted in the chart are calculated based on the market value of fixed income securities held by the Fund. If a security was rated by all three rating agencies, the middle rating was utilized. If rated by two of the three rating agencies, the lower rating was utilized, and if rated by one of the rating agencies, that rating was utilized. Standard & Poor's rates the creditworthiness of bonds, ranging from AAA (highest) to D (lowest). Ratings from A to CCC may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories. Standard & Poor's rates the creditworthiness of short-term notes from SP-1 (highest) to SP-3 (lowest). Moody's rates the creditworthiness of bonds, ranging from Aaa (highest) to C (lowest). Ratings Aa to B may be modified by the addition of a number 1 (highest) to 3 (lowest) to show relative standing within the ratings categories. Moody's rates the creditworthiness of short-term U.S. tax-exempt municipal securities from MIG 1/VMIG 1 (highest) to SG (lowest). Fitch rates the creditworthiness of bonds, ranging from AAA (highest) to D (lowest). Credit quality distribution is subject to change and may have changed since the date specified.

While this environment has certainly been painful for municipal investors, the drawdown has created significantly improved opportunities and entry points. Municipal to Treasury ratios ended the period elevated but at far better levels than in 2021. Municipal credit spreads have widened substantially while the underlying fundamental credit of municipalities remains strong following trillions of dollars in government stimulus. We believe investors will continue to return to the municipal market in the latter half of 2023, attracted by increased yields, positive fundamental strength, and good relative value.

Duration, yield-curve positioning, and sector allocation detracted from relative performance.

Security selection contributed marginally. Duration for the portfolio was slightly longer than its primary benchmark when the period began. We extended duration over the period with purchases at the long end of the curve and extended duration by about 6/10ths of a year longer than the benchmark, and the Fund performed well in the second half of the year. Similarly, yield-curve positioning was a modest detractor as we were underweight the better-performing shorter end of the yield curve and overweight the 20-year-and-longer end of the curve, which lagged the index. An overweight to bonds with 5% or higher coupons helped performance as these bonds tend to perform well in periods of rising rates.

EFFECTIVE MATURITY DISTRIBUTION AS OF JUNE 30, 20231

Figures represent the percentage of the Fund's long-term investments. Allocations are subject to change and may have changed since the date specified.

For the Bloomberg California Municipal Bond Index, AA-rated and A-rated credits were the strongest performers. The portfolio was underweight AA-rated and overweight A-rated. The portfolio was also overweight very high-grade AAA-rated bonds, which was the worstperforming portion of in the index. The Fund was also underweight BBB-rated bonds, though not all BBB-rated bonds performed equally, with challenging liquidity, particularly in the second half of the period. We continue to use our strong credit research capabilities to identify relative-value opportunities within the A-rated and lower segments. Sector allocation detracted during the period, with an overweight to revenue bonds and an underweight to GO bonds. The main subsector overweights included special tax, hospitals, housing, and water/sewer. Local GO bonds were one of the strongest performers in the index during the period, and the underweight to local GO bonds detracted from performance. Contributors include our overweight to industrial development revenue/pollution control revenue, which was the best-performing sub-sector during the period, as well as our overweight to special tax, which outperformed the index.

The outlook remains favorable for active bond management, in our view.

We believe the outlook for bond selection remains favorable. Increased dispersion within rating tiers and sectors offers the opportunity for differentiation among credits. As the period ended, primary and secondary market opportunities were favorable, with benchmark municipal yields elevated relative to the beginning of the period and wider credit spreads.

Fund expenses

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) on purchase payments and contingent deferred sales charges (if any) on redemptions and (2) ongoing costs, including management fees, distribution (12b-1) and/or shareholder servicing fees, and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The example is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period from January 1, 2023 to June 30, 2023.

Actual expenses

The "Actual" line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the "Actual" line under the heading entitled "Expenses paid during period" for your applicable class of shares to estimate the expenses you paid on your account during this period.

Hypothetical example for comparison purposes

The "Hypothetical" line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads) and contingent deferred sales charges. Therefore, the "Hypothetical" line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Class A	BEGINNING ACCOUNT VALUE 1-1-2023	ENDING ACCOUNT VALUE 6-30-2023	EXPENSES PAID DURING THE PERIOD ¹	ANNUALIZED NET EXPENSE RATIO
Actual	\$1,000.00	\$1,019.67	\$ 3.76	0.75%
Hypothetical (5% return before expenses)	\$1,000.00	\$1,021.08	\$ 3.76	0.75%
Class C				
Actual	\$1,000.00	\$ 1,016.76	\$ 7.50	1.50%
Hypothetical (5% return before expenses)	\$1,000.00	\$1,017.36	\$ 7.50	1.50%
Administrator Class				
Actual	\$1,000.00	\$ 1,020.68	\$ 2.76	0.55%
Hypothetical (5% return before expenses)	\$1,000.00	\$1,022.07	\$ 2.76	0.55%
Institutional Class				
Actual	\$1,000.00	\$1,021.03	\$ 2.41	0.48%
Hypothetical (5% return before expenses)	\$1,000.00	\$1,022.41	\$ 2.41	0.48%

¹ Expenses paid is equal to the annualized net expense ratio of each class multiplied by the average account value over the period, multiplied by 181 divided by 365 (to reflect the one-half-year period).

¹⁴⁴A The security may be resold in transactions exempt from registration, normally to qualified institutional buyers, pursuant to Rule 144A under the Securities Act of

- Variable rate demand notes are subject to a demand feature which reduces the effective maturity. The maturity date shown represents the final maturity date of the security. The interest rate is determined and reset by the issuer daily, weekly, or monthly depending upon the terms of the security. The rate shown is the rate in effect at period end.
- ¤ The security is issued in zero coupon form with no periodic interest payments.
- The interest rate is determined and reset by the issuer periodically depending upon the terms of the security. The rate shown is the rate in effect at period end. øø
- The issuer of the security is an affiliated person of the Fund as defined in the Investment Company Act of 1940.
- The rate represents the 7-day annualized yield at period end.

Investments in affiliates

An affiliated investment is an investment in which the Fund owns at least 5% of the outstanding voting shares of the issuer or as a result of other relationships, such as the Fund and the issuer having the same investment manager. Transactions with issuers that were affiliates of the Fund at the end of the period were as follows:

Notes to financial statements

1. ORGANIZATION

Allspring Funds Trust (the "Trust"), a Delaware statutory trust organized on March 10, 1999, is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). As an investment company, the Trust follows the accounting and reporting guidance in Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic 946, Financial Services - Investment Companies. These financial statements report on the Allspring California Tax-Free Fund (the "Fund") which is a non-diversified series of the Trust.

2. SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies, which are consistently followed in the preparation of the financial statements of the Fund, are in conformity with U.S. generally accepted accounting principles which require management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Securities valuation

All investments are valued each business day as of the close of regular trading on the New York Stock Exchange (generally 4 p.m. Eastern Time), although the Fund may deviate from this calculation time under unusual or unexpected circumstances.

Debt securities are valued at the evaluated bid price provided by an independent pricing service (e.g. taking into account various factors, including yields, maturities, or credit ratings) or, if a reliable price is not available, the quoted bid price from an independent broker-dealer.

Futures contracts that are listed on a foreign or domestic exchange or market are valued at the official closing price or, if none, the last sales price.

Investments in registered open-end investment companies (other than those listed on a foreign or domestic exchange or market) are valued at net asset value.

Investments which are not valued using the methods discussed above are valued at their fair value, as determined in good faith by Allspring Funds Management, LLC ("Allspring Funds Management"), which was named the valuation designee by the Board of Trustees. As the valuation designee, Allspring Funds Management is responsible for day-to-day valuation activities for the Allspring Funds. In connection with these responsibilities, Allspring Funds Management has established a Valuation Committee and has delegated to it the authority to take any actions regarding the valuation of portfolio securities that the Valuation Committee deems necessary or appropriate, including determining the fair value of portfolio securities. On a quarterly basis, the Board of Trustees receives reports of valuation actions taken by the Valuation Committee. On at least an annual basis, the Board of Trustees receives an assessment of the adequacy and effectiveness of Allspring Funds Management's process for determining the fair value of the portfolio of investments.

Futures contracts

Futures contracts are agreements between the Fund and a counterparty to buy or sell a specific amount of a commodity, financial instrument or currency at a specified price and on a specified date. The Fund may buy and sell futures contracts in order to gain exposure to, or protect against, changes in interest rates and is subject to interest rate risk. The primary risks associated with the use of futures contracts are the imperfect correlation between changes in market values of securities held by the Fund and the prices of futures contracts, and the possibility of an illiquid market. Futures contracts are generally entered into on a regulated futures exchange and cleared through a clearinghouse associated with the exchange. With futures contracts, there is minimal counterparty risk to the Fund since futures contracts are exchange-traded and the exchange's clearinghouse, as the counterparty to all exchange-traded futures, guarantees the futures contracts against default.

Upon entering into a futures contract, the Fund is required to deposit either cash or securities (initial margin) with the broker in an amount equal to a certain percentage of the contract value. Subsequent payments (variation margin) are paid to or received from the broker each day equal to the daily changes in the contract value. Such payments are recorded as unrealized gains or losses and, if any, shown as variation margin receivable (payable) in the Statement of Assets and Liabilities. Should the Fund fail to make requested variation margin payments, the broker can gain access to the initial margin to satisfy the Fund's payment obligations. When the contracts are closed, a realized gain or loss is recorded in the Statement of Operations.

Security transactions and income recognition

Securities transactions are recorded on a trade date basis. Realized gains or losses are recorded on the basis of identified cost.

Interest income is accrued daily and bond discounts are accreted and premiums are amortized daily. To the extent debt obligations are placed on non-accrual status, any related interest income may be reduced by writing off interest receivables when the collection of all or a portion of interest has been determined to be doubtful based on consistently applied procedures and the fair value has decreased. If the issuer subsequently resumes interest payments or when the collectability of interest is reasonably assured, the debt obligation is removed from non-accrual status.

Distributions to shareholders

Distributions to shareholders from net investment income are declared daily and paid monthly. Distributions from net realized gains, if any, are recorded on the ex-dividend date and paid at least annually. Such distributions are determined in accordance with income tax regulations and may differ from U.S. generally accepted accounting principles. Dividend sources are estimated at the time of declaration. The tax character of distributions is determined as of the Fund's fiscal year end. Therefore, a portion of the Fund's distributions made prior to the Fund's fiscal year end may be categorized as a tax return of capital at year end.

Federal and other taxes

The Fund intends to continue to qualify as a regulated investment company by distributing substantially all of its investment company taxable and tax-exempt income and any net realized capital gains (after reduction for capital loss carryforwards) sufficient to relieve it from all, or substantially all, federal income taxes. Accordingly, no provision for federal income taxes was required.

The Fund's income and federal excise tax returns and all financial records supporting those returns for the prior three fiscal years are subject to examination by the federal and Delaware revenue authorities. Management has analyzed the Fund's tax positions taken on federal, state, and foreign tax returns, as applicable, for all open tax years and does not believe that there are any uncertain tax positions that require recognition of a tax liability.

As of June 30, 2023, the aggregate cost of all investments for federal income tax purposes was \$761,649,698 and the unrealized gains (losses) consisted of:

Net unrealized losses	\$ (11 530 <i>4</i> 75)
Gross unrealized losses	(24,865,385)
Gross unrealized gains	\$ 13,334,910

As of June 30, 2023, the Fund had capital loss carryforwards which consist of \$47,829,369 in short-term capital losses and \$33,723,516 in long-term capital losses.

Class allocations

The separate classes of shares offered by the Fund differ principally in applicable sales charges, distribution, shareholder servicing, and administration fees. Class specific expenses are charged directly to that share class. Investment income, common fund-level expenses, and realized and unrealized gains (losses) on investments are allocated daily to each class of shares based on the relative proportion of net assets of each class.

3. FAIR VALUATION MEASUREMENTS

Fair value measurements of investments are determined within a framework that has established a fair value hierarchy based upon the various data inputs utilized in determining the value of the Fund's investments. The three-level hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The Fund's investments are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The inputs are summarized into three broad levels as follows:

- Level 1—quoted prices in active markets for identical securities
- Level 2—other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3—significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodologies used for valuing investments in securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used in valuing the Fund's assets and liabilities as of June 30, 2023:

		ED PRICES	OTHER SIGNIFIC OBSERVABLE IN (LEVEL 2)		SIGNIFICANT UNOBSERVABLE INPUTS (LEVEL 3)		TOTAL
Assets							
Investments in:							
Closed-end fund obligations	\$	0	\$ 5,400,00	0	\$0	\$	5,400,000
Municipal obligations		0	728,909,27	5	0	72	28,909,275
Short-term investments							
Investment companies	16	,409,618		0	0	1	6,409,618
Total assets	\$16	,409,618	\$734,309,27	5	\$0	\$75	0,718,893
Liabilities							
Futures contracts	\$	599,670	\$	0	\$0	\$	599,670
Total liabilities	\$	599,670	\$	0	\$0	\$	599,670

Futures contracts are reported at their cumulative unrealized gains (losses) at measurement date as reported in the table following the Portfolio of Investments. For futures contracts, the current day's variation margin is reported on the Statement of Assets and Liabilities. All other assets and liabilities are reported at their market value at measurement date.

Additional sector, industry or geographic detail, if any, is included in the Portfolio of Investments.

For the year ended June 30, 2023, the Fund did not have any transfers into/out of Level 3.

4. TRANSACTIONS WITH AFFILIATES

Management fee

Allspring Funds Management, a wholly owned subsidiary of Allspring Global Investments Holdings, LLC, a holding company indirectly owned by certain private funds of GTCR LLC and Reverence Capital Partners, L.P., is the manager of the Fund and provides advisory and fund-level administrative services under an investment management agreement. Under the investment management agreement, Allspring Funds Management is responsible for, among other services, implementing the investment objectives and strategies of the Fund, supervising the subadviser and providing fund-level administrative services in connection with the Fund's operations. As compensation for its services under the investment management agreement, Allspring Funds Management is entitled to receive a management fee at the following annual rate based on the Fund's average daily net assets:

AVERAGE DAILY NET ASSETS	MANAGEMENT FEE
First \$500 million	0.400%
Next \$500 million	0.375
Next \$2 billion	0.350
Next \$2 billion	0.325
Next \$5 billion	0.290
Over \$10 billion	0.280

For the year ended June 30, 2023, the management fee was equivalent to an annual rate of 0.39% of the Fund's average daily net assets.

Allspring Funds Management has retained the services of a subadvisor to provide daily portfolio management to the Fund. The fee for subadvisory services is borne by Allspring Funds Management. Allspring Global Investments, LLC, an affiliate of Allspring Funds Management and a wholly owned subsidiary of Allspring Global Investments Holdings, LLC, is the subadviser to the Fund and is entitled to receive a fee from Allspring Funds Management at an annual rate starting at 0.20% and declining to 0.10% as the average daily net assets of the Fund increase.

Administration fees

Under a class-level administration agreement, Allspring Funds Management provides class-level administrative services to the Fund, which includes paying fees and expenses for services provided by the transfer agent, sub-transfer agents, omnibus account servicers and record-keepers. As compensation for its services under the class-level administration agreement, Allspring Funds Management receives an annual fee which is calculated based on the average daily net assets of each class as follows:

	CLASS-LEVEL ADMINISTRATION FEE
Class A	0.15%
Class C	0.15
Administrator Class	0.10
Institutional Class	0.08

Prior to June 30, 2023, the class-level administration fee for Class A and Class C was 0.16% of the average daily net assets of each respective class.

Waivers and/or expense reimbursements

Allspring Funds Management has contractually committed to waive and/or reimburse management and administration fees to the extent necessary to maintain certain net operating expense ratios for the Fund. When each class of the Fund has exceeded its expense cap, Allspring Funds Management will waive fees and/or reimburse expenses from fund-level expenses on a proportionate basis and then from class specific expenses. When only certain classes exceed their expense caps, waivers and/or reimbursements are applied against class specific expenses before fund-level expenses. Allspring Funds Management has contractually committed through October 31, 2023 to waive fees and/or reimburse expenses to the extent necessary to cap

OLACC LEVE

expenses. Prior to or after the commitment expiration date, the caps may be increased or the commitment to maintain the caps may be terminated only with the approval of the Board of Trustees. As of June 30, 2023, the contractual expense caps are as follows:

	EXPENSE RATIO CAPS
Class A	0.75%
Class C	1.50
Administrator Class	0.55
Institutional Class	0.48

Distribution fee

The Trust has adopted a distribution plan for Class C shares pursuant to Rule 12b-1 under the 1940 Act. A distribution fee is charged to Class C shares and paid to Allspring Funds Distributor, LLC ("Allspring Funds Distributor"), the principal underwriter, an affiliate of Allspring Funds Management, at an annual rate up to 0.75% of the average daily net assets of Class C shares.

In addition, Allspring Funds Distributor is entitled to receive the front-end sales charge from the purchase of Class A shares and a contingent deferred sales charge on the redemption of certain Class A shares. Allspring Funds Distributor is also entitled to receive the contingent deferred sales charges from redemptions of Class C shares. For the year ended June 30, 2023, Allspring Funds Distributor received \$4,527 from the sale of Class A shares. No contingent deferred sales charges were incurred by Class A and Class C shares for the year ended June 30, 2023.

Shareholder servicing fees

The Trust has entered into contracts with one or more shareholder servicing agents, whereby Class A, Class C, and Administrator Class are charged a fee at an annual rate up to 0.25% of the average daily net assets of each respective class. A portion of these total shareholder servicing fees were paid to affiliates of the Fund.

Interfund transactions

The Fund may purchase or sell portfolio investment securities to certain affiliates pursuant to Rule 17a-7 under the 1940 Act and under procedures adopted by the Board of Trustees. The procedures have been designed to ensure that these interfund transactions, which do not incur broker commissions, are effected at current market prices. Pursuant to these procedures, the Fund had \$27,020,000, \$49,021,389 and \$(410,034) in interfund purchases, sales and net realized gains (losses), respectively, during the year ended June 30, 2023.

5. INVESTMENT PORTFOLIO TRANSACTIONS

Purchases and sales of investments, excluding U.S. government obligations (if any) and short-term securities, for the year ended June 30, 2023 were \$119,382,709 and \$429,977,834, respectively.

6. DERIVATIVE TRANSACTIONS

During the year ended June 30, 2023, the Fund entered into futures contracts as a tactical move to take advantage of dislocation in the market. The Fund had an average notional amount of \$7,899,940 in long futures contracts during the year ended June 30, 2023.

The fair value, realized gains or losses and change in unrealized gains or losses, if any, on derivative instruments are reflected in the corresponding financial statement captions.

7. BANK BORROWINGS

The Trust (excluding the money market funds), Allspring Master Trust and Allspring Variable Trust are parties to a \$350,000,000 revolving credit agreement whereby the Fund is permitted to use bank borrowings for temporary or emergency purposes, such as to fund shareholder redemption requests. Interest under the credit agreement is charged to the Fund based on borrowing rate equal to the higher of the Federal Funds rate or the overnight bank funding rate in effect on that day plus a spread. In addition, an annual commitment fee based on the unused balance is allocated to each participating fund.

For the year ended June 30, 2023, there were no borrowings by the Fund under the agreement.

8. DISTRIBUTIONS TO SHAREHOLDERS

The tax character of distributions paid was \$27,216,891 and \$33,638,034 of tax-exempt income for the years ended June 30, 2023 and June 30, 2022, respectively.

As of June 30, 2023, the components of distributable earnings on a tax basis were as follows:

\$632.048	\$(11 530 <i>4</i> 75)	\$(81 552 885)	
 INCOME	LOSSES	CARRYFORWARD	
TAX-EXEMPT	UNREALIZED	CAPITAL LOSS	
UNDISTRIBUTED			

9. CONCENTRATION RISK

The Fund invests a substantial portion of its assets in issuers of municipal debt securities located in a single state or territory of the U.S. Therefore, it may be more affected by economic and political developments in that state or region than would be a comparable general tax-exempt fund. As of the end of the period, the Fund's investments were concentrated in the state of California.

10. INDEMNIFICATION

Under the Fund's organizational documents, the officers and Trustees have been granted certain indemnification rights against certain liabilities that may arise out of performance of their duties to the Fund. The Fund has entered into a separate agreement with each Trustee that converts indemnification rights currently existing under the Fund's organizational documents into contractual rights that cannot be changed in the future without the consent of the Trustee. Additionally, in the normal course of business, the Fund may enter into contracts with service providers that contain a variety of indemnification clauses. The Fund's maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be estimated.

To the Shareholders of the Fund and Board of Trustees Allspring Funds Trust:

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of Allspring California Tax-Free Fund (the Fund), one of the funds constituting Allspring Funds Trust, including the portfolio of investments, as of June 30, 2023, the related statement of operations for the year then ended, the statements of changes in net assets for each of the years in the two-year period then ended, and the related notes (collectively, the financial statements) and the financial highlights for each of the years in the five-year period then ended. In our opinion, the financial statements and financial highlights present fairly, in all material respects, the financial position of the Fund as of June 30, 2023, the results of its operations for the year then ended, the changes in its net assets for each of the years in the two-year period then ended, and the financial highlights for each of the years in the five-year period then ended, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements and financial highlights, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements and financial highlights. Such procedures also included confirmation of securities owned as of June 30, 2023, by correspondence with the custodian, transfer agent and brokers. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements and financial highlights. We believe that our audits provide a reasonable basis for our opinion.

We have not been able to determine the specific year that we began serving as the auditor of one or more Allspring Funds investment companies; however, we are aware that we have served as the auditor of one or more Allspring Funds investment companies since at least 1955.

Boston, Massachusetts August 25, 2023

Other information

Tax information

Pursuant to Section 852 of the Internal Revenue Code, 100% of distributions paid from net investment income is designated as exempt-interest dividends for the fiscal year ended June 30, 2023.

Proxy voting information

A description of the policies and procedures used to determine how to vote proxies relating to portfolio securities is available without charge, upon request, by calling 1-866-259-3305, visiting our website at allspringglobal.com, or visiting the SEC website at sec.gov. Information regarding how the proxies related to portfolio securities were voted during the most recent 12-month period ended June 30 is available on the website at allspringglobal.com or by visiting the SEC website at sec.gov.

Quarterly portfolio holdings information

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year as an exhibit to its reports on Form N-PORT. Shareholders may view the filed Form N-PORT by visiting the SEC website at sec.gov.

BOARD OF TRUSTEES AND OFFICERS

Each of the Trustees and Officers listed in the table below acts in identical capacities for each fund in the Allspring family of funds, which consists of 127 mutual funds comprising the Allspring Funds Trust, Allspring Variable Trust, Allspring Master Trust and four closed-end funds (collectively the "Fund Complex"). This table should be read in conjunction with the Prospectus and the Statement of Additional Information1. The mailing address of each Trustee and Officer is 1415 Vantage Park Drive, 3rd Floor, Charlotte, NC 28203. Each Trustee and Officer serves an indefinite term, however, each Trustee serves such term until reaching the mandatory retirement age established by the Trustees.

¹ For those Officers with tenures at Allspring Global Investments and/or Allspring Funds Management, LLC that began prior to 2021, such tenures include years of service during which these businesses/entities were known as Wells Fargo Asset Management and Wells Fargo Funds Management, LLC, respectively.

Board consideration of investment management and sub-advisory agreements:

Under the Investment Company Act of 1940 (the "1940 Act"), the Board of Trustees (the "Board") of Allspring Funds Trust (the "Trust") must determine annually whether to approve the continuation of the Trust's investment management and sub-advisory agreements. In this regard, at a Board meeting held on May 15-17, 2023 (the "Meeting"), the Board, all the members of which have no direct or indirect interest in the investment management and sub-advisory agreements and are not "interested persons" of the Trust, as defined in the 1940 Act (the "Independent Trustees"), reviewed and approved for the Allspring California Tax-Free Fund (the "Fund"): (i) an investment management agreement (the "Management Agreement") with Allspring Funds Management, LLC ("Allspring Funds Management"); and (ii) an investment sub-advisory agreement (the "Sub-Advisory Agreement") with Allspring Global Investments, LLC (the "Sub-Adviser"), an affiliate of Allspring Funds Management. The Management Agreement and the Sub-Advisory Agreement are collectively referred to as the "Advisory Agreements."

At the Meeting, the Board considered the factors and reached the conclusions described below relating to the selection of Allspring Funds Management and the Sub-Adviser and the approval of the Advisory Agreements. Prior to the Meeting, including at a Board meeting held in April 2023, and at the Meeting, the Trustees conferred extensively among themselves and with representatives of Allspring Funds Management about these matters. The Board has adopted a team-based approach, with each team consisting of a sub-set of Trustees, to assist the full Board in the discharge of its duties in reviewing investment performance and other matters throughout the year. The Independent Trustees were assisted in their evaluation of the Advisory Agreements by independent legal counsel, from whom they received separate legal advice and with whom they met separately.

The Board noted that it initially approved the Advisory Agreements at a Board meeting held in May 2021, each for a two-year term, in advance of the sale of Wells Fargo Asset Management to Allspring Global Investments Holdings, LLC,1 a holding company indirectly owned by certain private funds of GTCR LLC and Reverence Capital Partners, L.P. (the "Transaction"). The Trustees also noted that, while they did not specifically consider the continuation of the Advisory Agreements in 2022 as a result of the two-year term that was approved in 2021, the Trustees received and considered certain information at a Board meeting held in April 2022 that was applicable to the Advisory Agreements, including an overview and financial review of the Allspring Global Investments business, information regarding certain ancillary agreements that were approved by the Board at the April 2022 Board meeting, and comparative data regarding Fund fees and expenses.

In providing information to the Board, Allspring Funds Management and the Sub-Adviser were guided by a detailed set of requests for information submitted to them by independent legal counsel on behalf of the Independent Trustees at the start of the Board's annual contract renewal process earlier in 2023. In considering and approving the Advisory Agreements, the Trustees considered the information they believed relevant, including but not limited to the information discussed below. The Board considered not only the specific information presented in connection with the Meeting, but also the knowledge gained over time through interactions with Allspring Funds Management and the Sub-Adviser about various topics. In this regard, the Board reviewed reports of Allspring Funds Management at each of its quarterly meetings, which included, among other things, portfolio reviews and investment performance reports. In addition, the Board and the teams mentioned above confer with portfolio managers at various times throughout the year. The Board did not identify any particular information or consideration that was all-important or controlling, and each individual Trustee may have attributed different weights to various factors.

After its deliberations, the Board unanimously determined that the compensation payable to Allspring Funds Management and the Sub-Adviser under each of the Advisory Agreements was reasonable, and approved the continuation of the Advisory Agreements for a one-year term. The Board considered the approval of the Advisory Agreements for the Fund as part of its consideration of agreements for funds across the complex, but its approvals were made on a fund-by-fund basis. The following summarizes a number of important, but not necessarily all, factors considered by the Board in support of its approvals.

Nature, extent, and quality of services

The Board received and considered various information regarding the nature, extent, and quality of services provided to the Fund by Allspring Funds Management and the Sub-Adviser under the Advisory Agreements. This information included a description of the investment advisory services and Fund-level administrative services covered by the Management Agreement, as well as, among other things, a summary of the background and experience of senior management of Allspring Global Investments, of which Allspring Funds Management and the Sub-Adviser are a part, and a summary of investments made in the Allspring Global Investments business. The Board also considered information about retention arrangements with respect to key personnel of Allspring Global Investments that were put in place in connection with the Transaction. The Board took into account information about the services that continue to be provided by Wells Fargo & Co. and/or its affiliates ("Wells Fargo") since the Transaction under a transition services agreement and the anticipated timeline for exiting the transition services agreement. In addition, the Board received and considered information about the full range of services provided to the Fund by Allspring Funds Management and its affiliates.

The trade name for the asset management firm that includes Allspring Funds Management and the Sub-Adviser is "Allspring Global Investments."

The Board considered the qualifications, background, tenure, and responsibilities of each of the portfolio managers primarily responsible for the day-today portfolio management of the Fund. The Board evaluated the ability of Allspring Funds Management and the Sub-Adviser to attract and retain qualified investment professionals, including research, advisory, and supervisory personnel.

The Board further considered the compliance programs and compliance records of Allspring Funds Management and the Sub-Adviser. The Board received and considered information about Allspring Global Investments' risk management functions, which included information about Allspring Funds Management's and the Sub-Adviser's business continuity plans, their approaches to data privacy and cybersecurity, and Allspring Funds Management's role as administrator of the Fund's liquidity risk management program. The Board also received and considered information about Allspring Funds Management's intermediary and vendor oversight program.

Fund investment performance and expenses

The Board considered the investment performance results for the Fund over various time periods ended December 31, 2022. The Board considered these results in comparison to the investment performance of funds in a universe that was determined by Broadridge Inc. ("Broadridge") to be similar to the Fund (the "Universe"), and in comparison to the Fund's benchmark index and to other comparative data. Broadridge is an independent provider of investment company data. The Board received a description of the methodology used by Broadridge to select the mutual funds in the performance Universe. The Board noted that the investment performance of the Fund (Administrator Class) was higher than the average investment performance of the Universe for all periods under review. The Board also noted that the investment performance of the Fund was lower than the investment performance of its benchmark index, the Bloomberg Municipal Bond Index, for all periods under review, except that the investment performance of the Fund was higher than the investment performance of its benchmark index for the ten-year period under review. The Board received information concerning, and discussed factors contributing to, the underperformance of the Fund relative to the benchmark for the periods identified above. The Board took note of the explanations for the relative underperformance during these periods, including with respect to investment decisions and market factors that affected the Fund's investment performance.

The Board also received and considered information regarding the Fund's net operating expense ratios and their various components, including actual management fees, custodian and other non-management fees, and Rule 12b-1 and non-Rule 12b-1 shareholder service fees. The Board considered these ratios in comparison to the median ratios of funds in class-specific expense groups that were determined by Broadridge to be similar to the Fund (the "Groups"). The Board received a description of the methodology used by Broadridge to select the mutual funds in the expense Groups and an explanation of how funds comprising expense groups and their expense ratios may vary from year-to-year. Based on the Broadridge reports, the Board noted that the net operating expense ratios of the Fund were lower than the median net operating expense ratios of the expense Groups for the Institutional Class, equal to the median net operating expense ratios of the expense Groups for the Class A shares, and in range of the median net operating expense ratios of the expense Groups for the Administrator Class.

The Board took into account the Fund's investment performance and expense information provided to it among the factors considered in deciding to re-approve the Advisory Agreements.

Investment management and sub-advisory fee rates

The Board reviewed and considered the contractual fee rates payable by the Fund to Allspring Funds Management under the Management Agreement, as well as the contractual fee rates payable by the Fund to Allspring Funds Management for class-level administrative services under a Class-Level Administration Agreement, which include, among other things, class-level transfer agency and sub-transfer agency costs (collectively, the "Management Rates"). The Board also reviewed and considered the contractual investment sub-advisory fee rates that are payable by Allspring Funds Management to the Sub-Adviser for investment sub-advisory services. It was noted that advisory fee waivers, if any, are at the fund level and not class level.

Among other information reviewed by the Board was a comparison of the Fund's Management Rates with the average contractual investment management fee rates of funds in the expense Groups at a common asset level as well as transfer agency costs of the funds in the expense Groups. The Board noted that the Management Rates of the Fund were in range of or lower than the sum of these average rates for the Fund's expense Groups for all share classes.

The Board also received and considered information about the portion of the total management fee that was retained by Allspring Funds Management after payment of the fee to the Sub-Advisor for sub-advisory services. In assessing the reasonableness of this amount, the Board received and evaluated information about the nature and extent of responsibilities retained and risks assumed by Allspring Funds Management and not delegated to or assumed by the Sub-Adviser, and about Allspring Funds Management's on-going oversight services. Given the affiliation between Allspring Funds Management and the Sub-Adviser, the Board ascribed limited relevance to the allocation of fees between them.

The Board also received and considered information about the nature and extent of services offered and fee rates charged by Allspring Funds Management and the Sub-Adviser to other types of clients with investment strategies similar to those of the Fund. In this regard, the Board received

information about the significantly greater scope of services, and compliance, reporting and other legal burdens and risks of managing proprietary mutual funds compared with those associated with managing assets of other types of clients, including third-party sub-advised fund clients and nonmutual fund clients such as institutional separate accounts.

Based on its consideration of the factors and information it deemed relevant, including those described here, the Board determined that the compensation payable to Allspring Funds Management under the Management Agreement and to the Sub-Adviser under the Sub-Advisory Agreement was reasonable.

Profitability

The Board received and considered information concerning the profitability of Allspring Funds Management, as well as the profitability of Allspring Global Investments, from providing services to the fund complex as a whole. The Board noted that the Sub-Adviser's profitability information with respect to providing services to the Fund and other funds in the complex was subsumed in the Allspring Global Investments profitability analysis.

Allspring Funds Management reported on the methodologies and estimates used in calculating profitability, including a description of the methodology used to allocate certain expenses and differences in how Allspring Global Investments calculates its pre-tax profit metric versus the methodology used when Allspring Funds Management was part of Wells Fargo. It was noted that the impact of such differences had only minor impact on the financial results presented. Among other things, the Board noted that the levels of profitability reported on a fund-by-fund basis varied widely, depending on factors such as the size, type, and age of fund.

Based on its review, the Board did not deem the profits reported by Allspring Funds Management or Allspring Global Investments from services provided to the Fund to be at a level that would prevent it from approving the continuation of the Advisory Agreements.

Economies of scale

The Board received and considered information about the potential for Allspring Funds Management to experience economies of scale in the provision of management services to the Fund, the difficulties of calculating economies of scale at an individual fund level, and the extent to which potential scale benefits are shared with Fund shareholders. The Board noted the existence of breakpoints in the Fund's management fee structure, which operate generally to reduce the Fund's expense ratios as the Fund grows in size, and the size of the Fund in relation to such breakpoints. The Board considered that in addition to management fee breakpoints, Allspring Funds Management shares potential economies of scale from its management business in a variety of ways, including through fee waiver and expense reimbursement arrangements, competitive management fee rates set at the outset without regard to breakpoints, and investments in the business intended to enhance services available to shareholders.

The Board concluded that Allspring Funds Management's arrangements with respect to the Fund, including contractual breakpoints, constituted a reasonable approach to sharing potential economies of scale with the Fund and its shareholders.

Other benefits to Allspring Funds Management and the Sub-Adviser

The Board received and considered information regarding potential "fall-out" or ancillary benefits received by Allspring Funds Management and its affiliates, including the Sub-Adviser, as a result of their relationships with the Fund. Ancillary benefits could include, among others, benefits directly attributable to other relationships with the Fund and benefits potentially derived from an increase in Allspring Funds Management's and the Sub-Adviser's business as a result of their relationships with the Fund. The Board noted that Allspring Funds Distributor, LLC, an affiliate of Allspring Funds Management, receives distribution-related fees in respect of shares sold or held through it.

The Board also reviewed information about soft dollar credits earned and utilized by the Sub-Adviser and fees earned in the past by Allspring Funds Management and the Sub-Adviser from managing a private investment vehicle for the fund complex's securities lending collateral.

Based on its consideration of the factors and information it deemed relevant, including those described here, the Board did not find that any ancillary benefits received by Allspring Funds Management and its affiliates, including the Sub-Adviser, were unreasonable.

Conclusion

At the Meeting, after considering the above-described factors and based on its deliberations and its evaluation of the information described above, the Board unanimously determined that the compensation payable to Allspring Funds Management and the Sub-Adviser under each of the Advisory Agreements was reasonable, and approved the continuation of the Advisory Agreements for a one-year term.

Liquidity risk management program

In accordance with Rule 22e-4 under the Investment Company Act of 1940, as amended (the "Liquidity Rule"), Allspring Funds Trust (the "Trust") has adopted and implemented a liquidity risk management program (the "Program") on behalf of each of its series (other than the series that operate as money market funds), including the Fund, which is reasonably designed to assess and manage the Fund's liquidity risk. "Liquidity risk" is defined under the Liquidity Rule as the risk that the Fund is unable to meet redemption requests without significantly diluting remaining investors' interests in the Fund. The Trust's Board of Trustees (the "Board") previously approved the designation of Allspring Funds Management, LLC ("Allspring Funds Management"), the Fund's investment manager, to administer the Program, and Allspring Funds Management has established a Liquidity Risk Management Council (the "Council") composed of personnel from multiple departments within Allspring Funds Management and its affiliates to assist Allspring Funds Management in the administration of the Program.

The Program is comprised of various components designed to support the assessment and/or management of liquidity risk, including: (1) the periodic assessment (no less frequently than annually) of certain factors that influence the Fund's liquidity risk; (2) the periodic classification (no less frequently than monthly) of the Fund's investments into one of four liquidity categories that reflect an estimate of their liquidity under current market conditions; (3) a 15% limit on the acquisition of "illiquid investments" (as defined under the Liquidity Rule); (4) to the extent the Fund does not invest primarily in "highly liquid investments" (as defined under the Liquidity Rule), the determination of a minimum percentage of the Fund's assets that generally will be invested in highly liquid investments (an "HLIM"); (5) if the Fund has established an HLIM, the periodic review (no less frequently than annually) of the HLIM and the adoption of policies and procedures for responding to a shortfall of the Fund's "highly liquid investments" below its HLIM; and (6) periodic reporting to the Board.

At a meeting of the Board held on May 16-17, 2023, the Board received and reviewed a written report (the "Report") from Allspring Funds Management that, among other things, addressed the operation of the Program and assessed its adequacy and effectiveness for the period from January 1, 2022 through December 31, 2022 (the "Reporting Period"). The Report noted significant liquidity events impacting the Funds related to extended foreign market holidays as well as the difficulty of trading and settlement of most Russia-related securities due to sanctions activity. The Report noted that there were no material changes to the Program during the Reporting Period.

Allspring Funds Management determined in the Report that the Program has been implemented and operates effectively to manage the Fund's, including the Fund's, liquidity risk, and Allspring Funds Management continues to believe that the Program has been and continues to be adequately and effectively implemented to monitor and, as applicable, respond to the Fund's liquidity developments.

There can be no assurance that the Program will achieve its objectives under all circumstances in the future. Please refer to the Fund's prospectus for more information regarding the Fund's exposure to liquidity risk and other risks to which an investment in the Fund may be subject.
